Subject: Testimonial about your campground by: Passport America Member

Good Morning Owner/Manager of Downtown Riverside RV Park,

Thank you from all of us here at Passport America for doing such a fantastic job accommodating our members. We received the following testimonial about your park from a PA member:

*Downtown Riverside RV Park, North Little Rock, AR -- We stayed here from Sunday evening thru Tuesday evening (06/25/17-06/27/17). Were actually planning on just 2 overnight stays but liked our spot so much that we opted for an additional night. There was plenty of interesting sites to see as we had never been here before. We enjoyed our tour of the Clinton Presidential Library (I MISS BILL), and having dinner on 2 occasions at restaurants in the River Market area. We walked across both pedestrian bridges on more than one occasion and enjoyed the lighted bridges in the evening. Other campers at this site were pleasant travelers to be with. We had hoped to tour the USS Razorback submarine but it was closed on the days that we could have gone. All of these things were within walking distance of the Riverside RV park. Park attendant (Sheila ?) was nice and helpful. Park had additional men's and women's restrooms with showers if we wanted. We had a spot on the river side of the park. They all had good views of the river and bridges. Park was secure with passcode pedestrian gates and had 24 hr. security attendant. Never experienced an issue or threat. Park had a good area to unhook and hook up our tow vehicle. Lots of Class A RVs stayed here. We felt small with our Class C 31 ft. Coachmen. Also several pull behind RVs, all nice and big pretty ones. The RV camp was about 20 minutes away from Little Rock AFB where we made a commissary run on one day. We would stay here again. Although the Arkansas humidity was 97% while there, the breeze off of the Arkansas River kept us comfortable while sitting outside our RV watching the boats on the river that were in a fishing tournament (about 50 fishing boats). All would gather at the launch just outside the RV park and head out about 5pm, then come back in at dusk. A pretty site with their red, green, and blue marker lights on the boats. Also saw several tug and barge traffic going up the river. Hook ups were good at each site, you do have to have a 30 amp to 50 amp adapter as all electrical hook ups were 50 amp. All the site pads were concrete and level and large. Plenty of room for the 31 ft. RV and our tow vehicle on the pad.*
